DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 4, 5, and 7-8 are allowed.

The following is an examiner's statement of reasons for allowance: As the claims were read and interpreted in light of the specification, the prior art of record fails to specifically disclose an X-ray generating apparatus having an X-ray tube within a housing sealed into vacuum for generating an X-ray including a grid voltage control, a pulse generator that changes an OFF state to an ON state and keeps the ON state for a predetermined period of time, an X-ray imaging apparatus that receives the pulse generated by the pulse generating means, an X-ray inspection system possessing the aforementioned x-ray generator, such that when the pulse generator has a trigger signal outputting means for outputting a trigger signal according to the detection of the object and where the imaging means receives the pulse outputted from the pulse generator and captures the X-ray transmission image when the pulse is in the ON state, and, in particular, an operational amplifier having one input for inputting a voltage generated by the cathode current detecting resistor and the other input terminal for inputting a predetermined negative voltage or a reference voltage and that in response to a generated pulse, the grid voltage control applies a cutoff voltage to the grid electrode when pulse is in the OFF state so as to prevent electron emitted from the cathode from reaching the anode target and applies a grid operating voltage by a cathode current detecting means that detects a cathode current and is adjusted such that the electron

emitted from the cathode so as to bombard the anode target attains a predetermined amount of quantity when the pulse is in the ON state.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to George Y. Wang whose telephone number is 571-272-2304. The examiner can normally be reached on M-F, 8 am - 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert H. Kim can be reached on 571-272-2293. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
